

February 2, 2010

The Honorable Nancy Pelosi
Speaker
U.S. House of Representatives
H-232 U.S. Capitol
Washington, DC 20515

The Honorable John Boehner
Minority Leader
U.S. House of Representatives
H-204 U.S. Capitol
Washington, DC 20515

The Honorable Charles Rangel
Chairman
U.S. House Committee on Ways and Means
1102 Longworth House Office Building
Washington, DC 20515

The Honorable Dave Camp
Ranking Member
U.S. House Committee on Ways and Means
1139E Longworth Office Building
Washington, DC 20515

Dear Speaker Pelosi, Minority Leader Boehner, Chairman Rangel and Ranking Member Camp:

We the undersigned U.S. biodiesel industry stakeholders are writing to you regarding the urgent and immediate need to retroactively extend the biodiesel tax incentive. It is imperative that Congress address expiration of this effective tax incentive in the first appropriate legislative vehicle. In addition, to provide needed certainty and promote the creation of domestic green jobs, we urge you to move expeditiously to provide a multiple year extension of a biodiesel tax incentive that is structured in a manner that promotes the domestic production and use of this clean-burning diesel replacement fuel.

The biodiesel tax incentive expired on December 31, 2009. The tax incentive is designed to make biodiesel price competitive with conventional diesel fuel, and is structured as an excise tax credit that allows the value of the incentive to be recognized immediately in the market price of the biodiesel. Thus, expiration of the tax incentive has essentially caused the production and use of biodiesel in the U.S. to cease and has placed the 23,000 jobs that are currently supported by the domestic biodiesel industry in immediate jeopardy. Companies have already started laying-off employees, and this situation is certain to worsen the longer the tax incentive is allowed to lapse.

Since its enactment in 2004, the biodiesel tax incentive has played a critical role in allowing the U.S. to reach commercial scale production of biodiesel. Despite growth in previous years, the U.S. biodiesel industry is in the midst of an economic crisis. Plants are having difficulty accessing operating capital. Volatility in commodity markets and reduced demand for biodiesel in both domestic and global markets are making it difficult for producers to sell fuel. Lastly, uncertainty relating to federal policy that is vital to the industry's survival is sending inconsistent signals to the marketplace and undermining investor confidence in the industry. The U.S. biodiesel industry has lost 29,000 jobs in 2009 as a result of these factors.

In spite of these challenges, there remain significant job creation, energy security and environmental benefits associated with the domestic production and use of biodiesel. In 2009, the U.S. biodiesel industry supported 23,000 jobs in all sectors of the economy. This added \$4.1 billion to the nation's Gross Domestic Product (GDP) and generated \$828 million in tax revenue for federal, state and local governments. Since 2005, the 1.9 billion gallons of biodiesel produced in the U.S. displaced an equivalent amount of diesel fuel with a clean-burning, efficient fuel that reduces lifecycle carbon dioxide emissions by 78 percent compared to petroleum diesel fuel and creates 4.56 units of energy for every unit of energy that is required to produce the fuel.

The Honorable Nancy Pelosi
The Honorable John Boehner
The Honorable Charles Rangel
The Honorable Dave Camp

Further, as the current situation clearly demonstrates, it is difficult for entrepreneurs and investors to make long-term business decisions based on year to year extensions of the biodiesel tax incentive. Thus, a multiple year extension of an incentive that is structured to promote domestic production and use of biodiesel is needed to provide certainty in the marketplace that will allow for sustained job creation in the domestic biodiesel industry.

Thank you in advance for your attention to this time sensitive issue that is of utmost importance to the U.S. biodiesel industry.

Sincerely,

A. Stemme Farms
