

Biodiesel Forum at SAE World Congress

The SAE 2010 World Congress will be meeting April 13-15 in Detroit, Michigan. In the past several weeks NBB has worked with SAE to secure a special forum on railroad engine combustion with biodiesel from 1 to 4 p.m. Wednesday, April 14. If you are already attending the World Congress, then this event will be free to attend. If not, you may purchase a one day pass for \$99 from this site:

<http://www.sae.org/congress/>.

If you have field experience with biodiesel use in railroads or an ongoing biodiesel railroad project, please forward the information to Dr. Richard Nelson (rnelson@ksu.edu) so that he can summarize the data for his presentation at the Forum. We anticipate that the outcome of the forum will be a list of technical needs to secure approvals for biodiesel blends in railroad applications. Below you will find the links that detail more information.
